Obsolete Features

The **Obsolete Features** section, found under the *Settings* tab in Manager.io, allows you to enable features that are no longer recommended for use. These features are retained for backward compatibility but may be removed in future updates. It is recommended to migrate to the newer alternatives to ensure optimal functionality and support.

⚙ **Settings** ❯ 🗞 Obsolete Features

Classic Custom Fields

If you are currently utilizing **Classic Custom Fields**, we suggest migrating to the new custom fields. The new custom fields offer enhanced functionality and better integration within the system.

- **Migration Guide**: Refer to **Classic Custom Fields** for detailed instructions on how to transition to the new custom fields.

Internal PDF Generator

For those using the **Internal PDF Generator**, it is advised to switch to using the system's print dialog. Instead of relying on the internal generator, click the **Print** button within Manager.io and use your operating system's print dialog to print or create PDF documents. This method provides better compatibility and results.

- **Alternative Method**: See **Internal PDF Generator** for more information on how to make this change.

Inventory Automatic Revaluation

If you are utilizing **Inventory Automatic Revaluation**, we recommend migrating to the new periodic inventory revaluations. The updated process offers improved accuracy and control over inventory valuations.

- **New Revaluation Process**: Learn more by visiting **Inventory Automatic Revaluation** to understand how to transition to the new system.

By updating to the latest features, you ensure that your Manager.io experience remains efficient, secure, and fully supported. If you have any questions or need assistance with the migration processes, please refer to the linked guides or contact support.
